

TABLE STRUCTURE

Login Table

Primary Key: login_id

Field Name	Data Type	Description
login_id	integer	User id
Username	varchar (20)	User name
Password	varchar (20)	Password

Category Table

Primary Key: cid

Field Name	Data Type	Description
cid	integer	category id
cname	varchar (20)	category name
size	varchar (20)	size

Table Item

Primary Key: itemid

Foreign key:cid

Field Name	Data Type	Description
itemid	integer	User id
cid	integer	User name
itemname	varchar (20)	Password
price	integer	Price of the item

Table order

Primary Key: Orderid

Foreign key:itemid

Field Name	Data Type	Description
orderid	integer	Order id
itemid	integer	itemid
No. of items	integer	No.of items
date	date	date of order
Delivery address	Varchar(20)	Address of user
Total amount	integer	Total amount

Table Payment

Primary Key: pid

Foreign key:orderid

Field Name	Data Type	Description
pid	integer	pid
orderid	integer	orderid
Payment date	integer	Payment date
Payment amount	integer	Payment amount
customerid	integer	customerid

Table feedback

Primary Key: fid

Foreign key:tid,cid

Field Name	Data Type	Description
Fid	integer	pid
tid	integer	orderid
cid	integer	Payment date
name	varchar(20)	Users name
date	date	date

feedback	varchar(20)	feedback
----------	-------------	----------

Table Tailor

Primary Key: tid

Field Name	Data Type	Description
tid	integer	pid
tname	varchar(20)	orderid
Payment date	varchar(20)	Payment date
Payment amount	varchar (20)	Payment amount
customerid	varchar(20)	customerid

Table measurement

Primary Key: mid

Foreignkey: eid, uid

Field Name	Data Type	Description
mid	integer	mid
tid	integer	tid
Measurement details	integer	Measurement details
Payment amount	varchar (20)	Payment amount
lastdate	date	lastdate

Table design

Primary Key: did

Field Name	Data Type	Description
did	integer	did
designname	varchar(20)	designname
models	varchar(20)	models

Table user

Primary Key: uid

Field Name	Data Type	Description
uid	integer	uid
name	varchar(20)	name
password	varchar(20)	password
Contact number	varchar(20)	contact
address	varchar(20)	Address of user
city	Varchar(20)	City of user
Email id	varchar(20)	Email of user
